

The Doorway to Advanced Energy Systems

BREAKTHRU-TECHNOLOGIES AND THE THERAPHI SYMPOSIUM

4 days of innovation and inspiration in South France
June 8 to June 11, 2018

Join us this summer in South France for a once-in-a-lifetime opportunity and the power to make a difference.

Featuring:

- ▶ **The THERAPHI DEVICE**
- ▶ **Hydrogen Frequencies**
- ▶ **Cold Fusion Physics**
- ▶ **Waste to Energy**
- ▶ **Hyper Sonic Propulsion**
- ▶ **Bio-Feedback Technology**
- ▶ **Longevity Science**
- ▶ **Universal Fractal Field Applications**
- ▶ **South France Tour starts June 12th**

Join our like-minded community who are serious about putting ideas into action and become an active participant in our planet's future.

Technology is evolving. Are you? If you're passionate about innovations in alternative energy systems, sustainability, health, longevity and interested in being part of the solution - not the problem, then the **Breakthru-T** is the place to be. We are devoted to the development of disruptive technologies that are sustainable, carbon-neutral, economical and community-supportive.

This classic event has attracted a very loyal following, and our inventions continue to gain a worldwide interest. We are delighted to secure a venue in the heart of South France, where you can enjoy the countryside, food and flavors that make this part of the world famous. We have also organized a South France tour after the conference, where you can discover the deep mysteries and beauty of this part of France.

We are living in a phenomenal age where new paradigm thinking is coming of age! This unique symposium is bringing together an intimate scintillating group to share, research, discuss, celebrate and move forward breakthroughs in science, natural healing, green energy and the unified field theory. Attendees will gain an in-depth knowledge of cutting edge inventions – such as the harnessing of energy via the unified field, coldfusion hydrogen technologies and The Theraphi Plasma Healing Device.

Discover the solutions to
the growing energy and
environmental needs of
our planet
and get involved!

The Location

La Borde Blanque is an authentic French country farmhouse, situated on a private lakeside beach in Lac de Montbel. The 12-acre estate in the foothills of the Pyrenees is surrounded by natural forests, including a natural spring and bathes in the peace and serenity of the French countryside. Old pilgrim routes through the varied landscape offer numerous opportunities for hiking.

Our website has all the information you need on location, travel, directions, featured speakers and topics, booking and payment details, including: 11 day South France Tour beginning June 12, 2018.

www.Breakthru-Technologies.com Email: info@Breakthru-Technologies.com

The Symposium features:

Dan Winter (France/USA)

Understanding the Fractal Field Universe and applying Hydrogen Ratio Frequencies

Paul Harris (Canada)

Theraphi Device, Longevity and Stem Cell research

Roger Green (NZ/NYC)

Your MC, updates on Fractal Wave, Waste to Energy

Jean Paul Biberian (France)

Cold Fusion Physics

Patrick Botte (Belgium)

Advanced bio-feedback methods with audience participation

Elizabeth Donovan (USA)

Hypersonic propulsion projects, cold fusion and isotope transitions

Stephane Cardinaux (Switzerland)

The science of geo-biology and geo-mantics

Dr Sandra Rose Michael (USA)

Applied integrative biophysics

Sacha Stone (UK)

The amazing Klotho Longevity Hormone

Carla Bate (USA)

The amazing Klotho Longevity Hormone

Alan Rhode (USA)

The Tesla Tron Healing machine, Super-luminosity and the legacy of Guy Obolensky

Dr. Terry and Alan Burns (USA)

Harp music and talks on the wisdom of the Western hermetic traditions

Ani Williams

Harp music and the Alchemy of Sound
