

## Greetings Beautiful Friends from Around the World,

I hope this news finds you well and managing to navigate our current global shifts. We knew there were changes afoot, but most had not imagined this. I am finding this time productive and healing...more daily walks in nature and an opportunity to work on new music and projects. Now more than ever, we need art, music, and healing tools. Thankfully sound medicine can support us all now as humanity releases the old paradigms to forge a new path as compassionate beings, caring for each other and our precious planet.

**New CD release for Earth Day 2020!** Recently I revisited my music from the 1980s and 90s, and realized the lyrics written decades ago are important for our current time. Gathering 11 songs from 5 different albums, this album celebrates a New Earth and how we can live our lives as a mirror of nature.

***“Earth is rising, she's coming swiftly -  
Humming, gliding, wild and free.”***

Often the song inspirations emerged from a stone circle, a wind-swept moor, or a Mayan grandmother, revealing timeless wisdom of the ancient ones. Each Mp3 download includes a 14-page file with lyrics, stories and images.

Every morning for the last year, I have been offering this morning prayer as I light a candle. It is for you all and I invite you to join me in this daily, to benefit humanity and our beloved earth:

***May all beings be happy, may all beings be free—***
